

No signal coming from the aggregation switch

Overview

Some possible causes are that the adapters in the aggregation are set to different line speeds or duplex modes or that they are plugged into different switches. Verify the adapters' configuration. This article describes how to resolve an issue where the FortiSwitch status shows as 'Offline' after upgrading FortiGate. Idle. set switch-controller-mgmt-vlan 4094 <- This is the default management VLAN on FortiGate. 08-28-2024 12:18 AM I will check the detail log, but while i removed the one of the lan cable connected with port-channel on L2 9300 switch to. The customer wanted 25G ports between his buildings and went with the pro aggregation switches and some SFP28 modules (ESR (300m). · Physical link fault on the member. Use the entstat command to troubleshoot IEEE 802. Static LAG or LACP does not link up or aggregate the speed. When LACP (Link Aggregation Control Protocol) or static LAG (Link Aggregation Group) is not functioning properly, common troubleshooting steps and checkpoints include: 1.
