

Overseas warehouse optical fiber terminal 200G

Overview

The 200G QSFP-DD SR8 Transceiver is designed to transmit and receive serial optical data links up to 28 Gb/s data rate (per channel) over multi-mode fiber. It is a small-form-factor hot pluggable transceiver module integrated with the high performance VCSEL laser and high. FS 200G HDR InfiniBand optical transceiver modules and cables solution used for high-bandwidth data transmission, data centre and AI computing applications. Trusted by 260K+ Enterprise Users. Detailed information of 200G offered by Formerica Optoelectronics Inc. 4T switches and large-scale AI clusters. More compatible brands will be available for delivery imminently so please reach out to the Pro Optix team for latest updates. Pro Optix also. Sanopti's 200G QSFP56 portfolio consists of transceivers which can operate over Single-Mode Fiber (SMF) or Multi-Mode Fiber (MMF), can be used for connection distances from a couple of meters up to 2 kilometers and can support up to 212.
