

Performance of the electrical distribution box in the Guinea workshop

Overview

It has the following sub-components (a) Reconfiguration of the low voltage distribution system into a high voltage distribution system to improve the quality of supply; (b) Enhancing the coverage and quality of metering for high tension and low tension customers; (c) Improved. It has the following sub-components (a) Reconfiguration of the low voltage distribution system into a high voltage distribution system to improve the quality of supply; (b) Enhancing the coverage and quality of metering for high tension and low tension customers; (c) Improved. The Guinea Power Access Improvement Project (PAAEG) is part of the National Least Cost Power Access Rollout Programme (PNAEMC) initiated by the Government and aimed at achieving universal access to electricity by 2030. The project is designed to address the energy infrastructure needs of areas. As of April 30, 2024, the total disbursement rate of the IDA financing stood at 89 percent, with a total of US\$44. 6 million disbursed, and a total of US\$5. The undisbursed amount has been fully committed with all major contracts signed and being under implementation. Its overall objective is. The Guinea Electricity Sector Efficiency Improvement Project seeks to improve the electricity sector's commercial and operational efficiency. These results will be achieved through critical investment support and capacity building, which will impact the financial viability of the sector and quality. A Power Sector Recovery Project supervised by the World Bank has been adopted by the Guinea Conakry's Government since 2012 in order to put an end to the severe crisis of the Guinean power sector. Lessons learnt by the Bank from PREREC.
