

Power supply for national standard PoE switches

Overview

56 volt 120 watt UL/CE/FCC rated DC power supply. Designed for optimal compatibility with our PoE injectors and switches, this 56v power supply offers safe, reliable, and efficient long-distance Power over Ethernet applications. Westermo devices feature dual power inputs—primary and secondary—ensuring uninterrupted operation in case of one power source fails. It is always going to be a key part of a modern business network setup. PoE is an emerging new capability to deliver data and power to internet appliances over existing CAT-5 Ethernet. Power and data can be delivered simultaneously over Ethernet connections, thanks to a ground-breaking technology called Power over Ethernet (PoE). 3at. PSE equipment refers to the network equipment that supports PoE technology, which is one of the core parts of the PoE power supply system.
