

Secondary power distribution box of the convention center

Overview

The Secondary Distribution Box (SDB) receives power from Main Power Distribution box via an extender cable and provides a central power distribution to feed normal branch circuits to the electric floor modules through snap-on extender cables. Our convention center floor boxes help meet all your temporary power needs including data, air and water. This Distro-Box is used to assist in the set up and tear down for assemblies at convention centers. We have spent years designing floor boxes and in approving the usage of these floor boxes. A feeder usually begins with a feeder breaker at the distribution substation. By focusing on reliability, flexibility, safety, and sustainability, engineers can create systems that meet the dynamic needs of modern events while setting new standards for. Concrete Concrete, Recessed, Painted Galvanized Galvanized Stamped Steel Box, Convention Center Utility Box, Power & Data/Communications & Air/Water, Ships with Covers, Power Panel Purchased Separately Box for Power/Data and Air/Water Services; Painted Galvanized Galvanized Stamped Steel Box.
