

Semi-high type distribution box

Overview

These are specialized, compact switchgears used in cable-based power distribution networks at voltages like 12kV. Wieland is your experienced and reliable partner for efficient, pluggable and decentralized electrical installation. Among our distribution boxes you will find the smart and practical solution for your project or business. From power and signal distribution to I&C applications and complete room. The metal distribution box is designed for a wide range of low-voltage applications in residential buildings, commercial complexes, offices, and industrial facilities. It is suitable for environments requiring high mechanical durability, enhanced corrosion resistance, and reliable operation. Our mission is to meet customer's expectations by providing satisfaction through cost, quality, service, delivery and continuous improvement. High-quality materials and robust product designs ensure a reliable connection, signal transmission and power. In this guide, we'll break down the 12 main types of distribution boxes in a way that's easy to understand. We'll chat about what each one does, where it shines, and then dive into how to choose the perfect box for your needs. Product Overview The CA-44as is a double insulation modular box equipped with a high opaque.
