

Simple Optical Crossing Box

Overview

The optical crossing cabinet is composed of the optical cable stripping and fixing components, the splicing and wiring module, the fiber storage area, the parking area and the splitter installation area, etc. to complete the leading-in and fixing of the optical cables, the. A cross connect cabinet, also known as an optical cross cabinet or OCC is a device used for connecting, distributing, and dispatching trunk optical cables and distribution optical cables in communication networks for communication systems, power systems, traffic control systems and cable TV. Corning's family of optical cross-connects (OCCs) are versatile, fully enclosed cabinets designed for fiber optic rack-mountable hardware. This product is already in your quote request list. GAOTek SMC Fiber Optic Cross Connection Outdoor.
