

Switch MAC Access

Overview

Get a step-by-step guide on how to configure access restriction and traffic filtering on switch ports using MAC ACL (MAC Access Control List). It blocks or allows users to access specific resources. An ACL contains the hosts that are permitted or denied access to the network device. What are MAC access control lists (ACLs) and how do they work with my NETGEAR Smart Switch or fully managed switch?

- NETGEAR Support Support / Enterprise / Knowledge Base / Troubleshooting / What are MAC access control lists (ACLs) and how do they work with my NETGEAR Smart Switch or fully managed. Access control entries (ACEs) are the rules that determine traffic classifications for access control lists (ACLs). You can define MAC address ACEs based on criteria such as source and destination MAC addresses, MAC address masks, and VLAN IDs. Select Security > ACL > MAC.
