

Telecom Large Distribution Box

Overview

The Large Distribution Wall Box is a wall mounted splice box used for the distribution of fibres to customer drop cables. The unit has a capacity of up to 240 fibre splices and can accommodate input cables of butt, loop and in-line types. Up to 48 customer drop cables of 3-6mm in diameter, and 8. Langmatz offers innovative solutions from network level 3 to the fiber optic termination point – from robust plastic cable chambers and network distributors to wall entries. Our products ensure secure signal transmission and reliable network coverage. Constant service OEMs working in fixed and mobile networks, rail, data centres, water. Our flexible distribution boxes enable reliable, decentralised signal transmission and power transmission up to protection class IP67 – wherever passive distribution boxes are required.
