Ultra-thin three-level distribution box for construction sites

Overview

A multistage three-phase distribution box for a construction site comprises a base, wherein a protective cover with a mesh structure is arranged on the top surface of the base, three distribution boxes with the same structure are slidably mounted inside the protective. A multistage three-phase distribution box for a construction site comprises a base, wherein a protective cover with a mesh structure is arranged on the top surface of the base, three distribution boxes with the same structure are slidably mounted inside the protective. ENERGYBOX is a complete range of Assemblies for Construction Sites (ACS) pre-wired boards that can be wall-mounted or installed on a support. The panels are made in a sturdy and handy two-component technopolymer cabinet with a fire-resistant backrest, which allows them to be stored and reused in. Here, decentralized electrical installation has proven its worth: Our distribution boxes offer the necessary installation space for pluggable installation - for the most diverse applications in the most diverse areas of use: Our distribution box can be used wherever high demands and harsh. How to Choose a Site Level 3 Distribution Box□Purchase Notes□. Select the rated current of the main switch for the Level 3 Distribution Box according to the configuration of the on-site Level 2 Distribution Box. Example: If the outgoing current of the Level 2 Distribution Box is 63A, select a 63A. BOSECKER construction site power distributors are designed and manufactured in accordance with the manufacturer standard IEC 61439 and user standard IEC 60364. The robust sheet steel housing has been.
