A network cabinet, sometimes referred to as a network rack or data cabinet, is a specialized enclosure designed to house and organize network equipment. Think of it as the secure, organized, and climate-controlled “nerve center” for your network equipment. Unlike traditional floor-standing racks, these cabinets are recessed, which means they don't take up valuable floor space. They're designed to hold important networking equipment such as switches, patch panels. What Cable Management Does for a Network Cabinet A cable management rack is designed to route, protect, and organize copper and fiber cables inside network cabinets.
