

Waterproofing of holes in distribution boxes

Overview

Waterproof distribution box manufacturers tell you that the way to waterproof an outdoor distribution box is to first choose a distribution box made of waterproof material, seal the cable entry points, apply silicone sealant, install a weatherproof cover, use outdoor rated sockets. Waterproof distribution box manufacturers tell you that the way to waterproof an outdoor distribution box is to first choose a distribution box made of waterproof material, seal the cable entry points, apply silicone sealant, install a weatherproof cover, use outdoor rated sockets. In order to ensure the waterproof performance of distribution boxes, manufacturers will strictly seal the joints of the box. Usually, rubber sealing rings or sealants are used for sealing to effectively prevent the intrusion of rainwater, sand and dust. In addition, for some special interfaces. Ensuring the safety of the waterproof junction box is an important step in ensuring the proper functioning and protection of the device. Another electrician and I were talking about caulking the box and I mentioned installing drain holes. Key design points include high-quality materials like ABS plastic, aluminum, and stainless steel that resist corrosion and UV.
