

What are the indicator lights on the terminal box

Overview

The main indicators include Power, PON, LOS (Loss of Signal), and LAN or Port 1. Recognising these signals helps maintain. The lights on your ONT are typically LED indicators that display different colors and patterns to convey information about the device's status. The most common colors used are: The Power light is usually the first light to check when troubleshooting your ONT. System is operating normally without alarms. Power down for 15mins then power back on and wait 3mins for the lights to settle Power connector has come loose. Plug a lamp into the same plug socket and see if it turns on. Optical: This should be a solid. The Fibre Connection Box on your wall (the engineers will call this the Optical Network Terminator or ONT) is where the Fibre comes into your home.
