

What is a mesh cable tray also called

Overview

A Wire Mesh Cable Tray, also known as a cable management basket, is a structural support system designed to hold and manage cables across various settings. Typically made from materials like steel, aluminum, or high-density plastic, these trays feature an open design that allows for easy access to. An electrical cable tray is a type of containment system used to support insulated electrical cables for power distribution, control, and communication. Today, electrical cable trays have become an essential component in industrial and commercial construction, providing a quick, economical, and. Wire mesh cable trays—often called basket trays—are constructed from welded steel wire, forming a lightweight open-grid structure. Unlike traditional formed trays, wire mesh trays rely on distributed wire intersections for strength rather than solid rails or rungs. It is designed to route, protect, and organize power, data, and communication cables in a safe and efficient way.
