

Which country had its fiber optic cables cut

Overview

On September 6, 2025, a cable cut in the Red Sea disrupted internet connectivity across multiple countries, including India, Pakistan and the Middle East region. Two undersea cables carrying internet data deep in the Baltic Sea were damaged, European telecommunications companies said this week, drawing warnings from European governments of possible Russian "hybrid warfare" targeting global communications infrastructure. On Wednesday, interest was focused on. The German government has blamed an act of sabotage for the cutting of two important undersea fiber optic cables, one connecting connecting Finland and Germany, and the other linking Sweden and Lithuania, on Sunday and Monday. The first cable break happened at around 8 a. Microsoft said in a status update that the Middle East "may experience increased latency due to undersea fibre cuts in the Red Sea," but gave no other details.
