

Which one on the fiber optic router is the IP address

Overview

The default IP address of your router is written on a sticker on the back side of the router. Public IP Address - Some routers may have a public IP address. Fortunately, finding your router's IP address on any computer, phone, or tablet is easy. Android: Open WiFi Analyzer and go to ☰ > Access points > your router. iPhone: A router IP address is a unique numerical identifier that allows devices on your network to communicate with your router. This address typically looks like 192. Very briefly, you can find your router's IP address in your Command Prompt (Windows), in your Network settings on Macs, iPhones, and. Understanding the basic difference between your router and Wi-Fi IP address is crucial to running network settings, improving security postures, and optimizing overall performance.
